

CONCRETE SERVICES

Trusted Concrete Contractors Since 1975

MUNICIPAL CONTRACTING

MUNICIPAL CONTRACTING

CURBS, GUTTERS & SIDEWALKS

We work with many engineering firms and municipal planners throughout Alberta and the Northwest Territories to place new residential curbs, gutters and sidewalks. We also remove, replace and make repairs to old sidewalks and curbs that have taken a beating through the years and require a little TLC.

We work closely with our clients to ensure our projects are completed on time and within budget. You can trust our four decades of experience to get the job done right!

MUNICIPAL CONTRACTING BARRIERS

Proform Concrete Services completed its first concrete barrier project in 1984 and has been perfecting the process ever since. We utilize a four track side mount barrier machine which provides additional stability and slipform head pressure for superior barrier slipforming performance. We can accommodate complex designs and have the ability to slipform barriers with reinforcement cages for added strength.

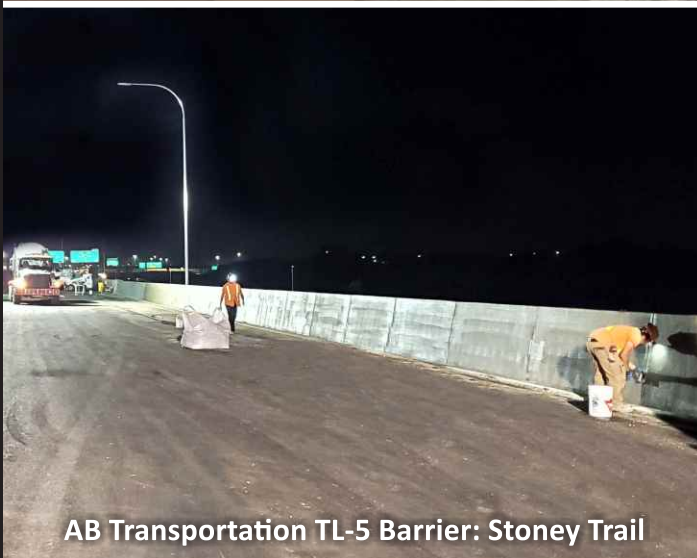

Trust our experienced team, to ensure your next project has superior formed barriers that will deliver unbeatable performance.

MUNICIPAL CONTRACTING

RETAINING WALLS

Proper retaining wall construction aids in holding back sloping soil, erosion and controlling water drainage. Not only are retaining walls functional but they can be used to create a more useful space and add pleasing architectural features.

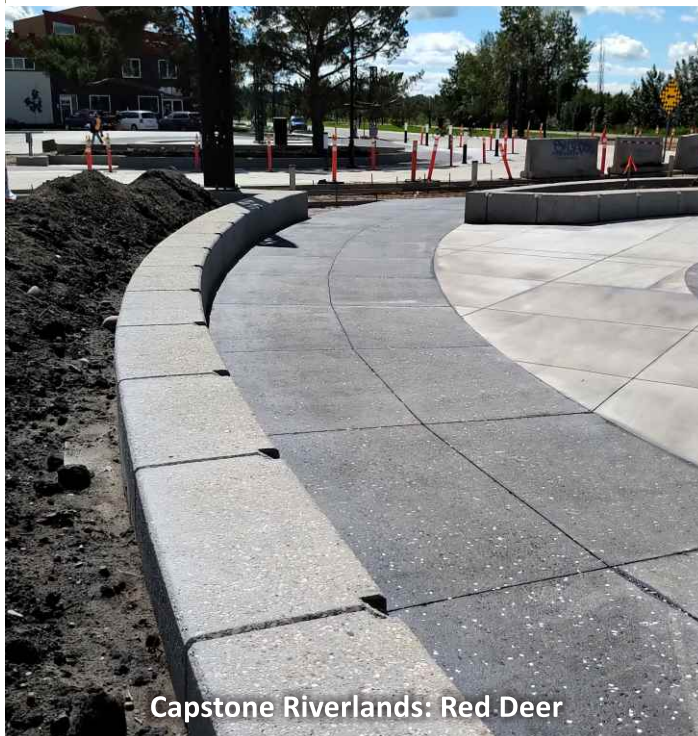

Poured in place concrete retaining walls are durable and can be designed to include color, texture, embedded objects or benches and much more. When installed properly, concrete offers much more room for customization than any other retaining wall material.

Roundabout Retaining Walls

MUNICIPAL CONTRACTING BEAUTIFICATION

Add style to parks, downtown areas, green spaces, walkways and pools with our decorative concrete applications. Transform traditional concrete into a high-end finish or integrate landscaping for a beautiful focal point. Explore the possibilities of your municipal project and build a more sustainable and livable space that will set your project above the rest. Choose from a variety of finishes and designs that are versatile, durable and cost-effective:

- Stamped
- Coatings
- Decorative Cutting
- Glass Seeded Concrete
- Exposed
- Acid Staining
- Sand Blast Finish
- Paving Stones

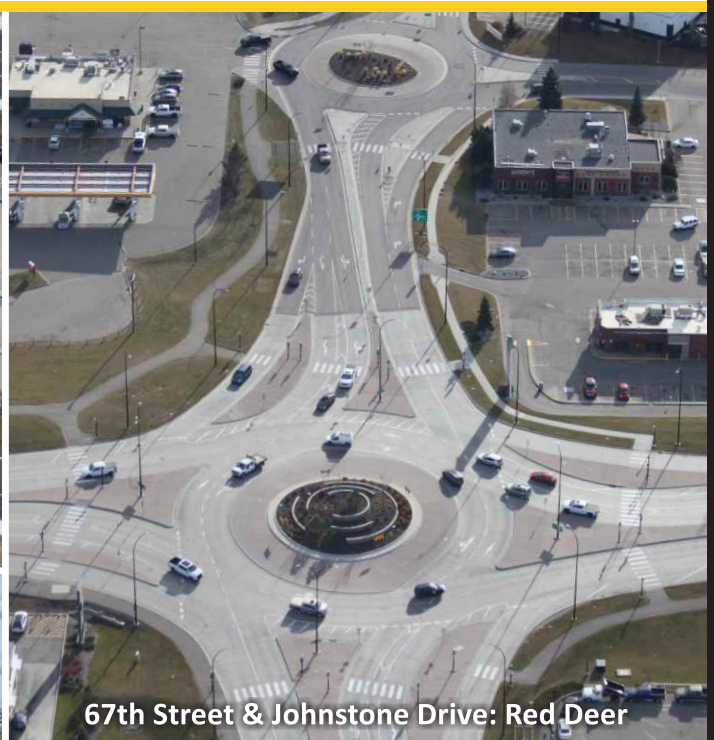

MUNICIPAL CONTRACTING

ROUNDBABOUTS

Roundabouts are proven to be safer and a much more efficient way of moving traffic. More and more municipalities are adding roundabouts at critical intersections.

For intersections that have high commercial truck traffic, Proform offers fully concrete paved roundabouts. They can be designed to feature a retaining wall or beautification focal point in the centre.

Concrete paved roundabouts are both durable and sustainable and carry a design life of 40 years or more.

MUNICIPAL CONTRACTING PAVING

Proform leads the industry in Western Canada for innovation in road, parking lot, intersection and transit zone concrete paving. Concrete paving is durable, sustainable, low maintenance and has an extended life cycle while eliminating potholes and rutting.

Awards: Proform is the proud recipient of the American Concrete Institute (ACI) 2017 Award of Excellence in Concrete in the category of Advanced Concrete Construction for our work on 67th Street and Johnstone Drive in Red Deer, AB. This was the first fully concrete paved roundabout in Western Canada.

- Roads
- Parking Lots / Parkades
- Intersections
- Transit Zones / Lanes
